This folding plastic pallet box, sometimes called a Magnum, is a fully collapsible plastic box with fully removable sides. The collapsible plastic box pallet is injection moulded from food grade polypropylene so can serve a multitude of uses for storage of products in warehouses. The magnums pallet boxes have a half drop gate on one long and one short dimension. Available as an option is a plastic drop on lid. The magnum boxes when full can be stacked up to three high and as the folding boxes are made from plastic they are both fully washable and immune to weather and rusting issues. The boxes are also 100% recyclable.
