Mobile Steps lead time is generally 7-10 Days. Whilst we stock the step components, the mobile steps are built to order. We would typically allow 3 days to build the steps, a day to paint them and then dispatch the ladders on a 3-day service.

An increasing problem within the road haulage industry is how safe access is gained onto the back of a lorry or trailer. We have developed a mobile walk-through access ladder fitted with 2 substantial 200mm nylon wheels and 2 smaller 100mm diameter wheels housed in swivel castors for easy movement. On the side is mounted a brake lever which disengages the smaller wheels when in use, allowing a safe stable platform. Also fitted is a safety rail at the top and a safety notice on the side.

Mobile steps are painted as standard using a one coat primer/finish - Zinfos 700CT, or can be galvanized.
