Securing Chains
Lift-Off Bridge Ramp
Hinged Folding Flap
Galvanized Finish

Mobile platform lead time is generally 10-15 days. Whilst we stock the components, the platforms are built to order. We would typically allow 5 days to build the platforms, a day to paint them and then dispatch on a 3-day service.

Specifications	
Platform Width	2000mm
Platform Depth	1250mm
Platform Height	1280mm
Handrail Height	1000mm
Platform Load Capacity (standard wheels)	800kg

When trailers or shipping containers need to be unloaded and there is no loading bay or dock to reverse up to, then there is a potential unloading risk. This mobile platform with rungs is designed to alleviate the risks involved.

This is mobile access platform model R7 which is designed specifically to enable safe working from the rear of vehicles. The platform can either be mobile on wheels with brakes or can be moved by forklift and have optional jacking legs. The mobile access platforms come with braked swivel wheels as standard. Optional wind down legs can be added so the platform can be used with trucks of differing heights.

All other sizes can be custom made — please contact us with your requirement.
