Front Opening in Handrailing for Forklift Access	1400mm
Platform Load Capacity on Standard Castors	800kg

This is mobile access platform model S1 which is designed specifically to enable safe working from the rear of vehicles. When trailers or shipping containers need to be unloaded and there is no loading bay or dock to reverse up to, then there is a potential unloading risk. This mobile platform with easy use integral steps is designed to alleviate the risks involved.

The platform is available in 2 widths (1.9m Standard / 2.5m Wide). The platform can either be mobile on wheels with brakes or can be moved by forklift and have optional jacking legs. As standard the step access platform is painted - colour blue RAL 5010, or can be galvanized.

Other platform sizes, heights and openings etc can be custom made to order.
