Persons	Max 2 persons

Our WP450 Folding Forklift Safety Access Cage is a very cost effective unit but yet a high quality is still maintained. The safety cage, also known as a forklift access platform, is safer than a ladder and less expensive and quicker than scaffolding and is manufactured in separate pieces, which are then held together by various split pins. It has a load capacity of 450kg and is suitable for 2 persons. The unit's ability to fold is the key feature. When not in use the unit can be compacted down for storage, it can also be compacted down for transportation to and from any sites where site work may be occuring. The deck of the cage is formed from 3mm steel chequer plate to provide grip for the operators to stand on. The back panel is covered with 50x50mm mesh to prevent any body parts from being caught in the forklift mast when being lifted.
