Specifications	
Width	1150 mm
Depth	1100 mm
O/A Height	2070 mm
Internal Height	1000 mm
Weight	110 kg
Load Capacity	250 kg

Our Budget Forklift Safety Access Cage is a very cost effective unit but yet still made to a good standard. The safety cage, also known as a forklift access platform, is safer than a ladder and less expensive and quicker than scaffolding. It has a load capacity of 250kg and is suitable for 2 persons. When in use, the forklift cage must be secured to the forklift. This budget safety cage has a sliding bolt which secures the forklift cage to the heel of the fork. This must be used when in use. The back panel is covered with 50x50mm mesh to prevent any body parts from being caught in the forklift mast when being lifted. The door opens internally so no-one can fall out, and has a flick-over catch for added protection to stop the forklift cage door accidentally being opened. The upper back section is fixed in position with a warning sign in place.
