Volume - Cubic metres	1 m³
Skip Length	1200mm
Skip Width	1000mm
Skip Height	1090mm
Clearance	90mm
Load Capacity	2000kg

This product is a rotating forklift dumping bin, for use with a telehandler to perform the bins rotation, the bin is sturdy and is one rigid construction. The rotating dumping bin has 2 heavy duty forklift sleeves that span the whole unit (836mm centre to centre of fork sleeves), guaranteed to support the max load of 2000kg, before the bin is used a securing chain should be attached to the unit and then wrapped around the mast of the telehandler to stop any chance of it falling off throughout the rotation process. This unit is also stackable with itself, this makes them spatially efficent for transport, if wanting to order multiple units call us for a discount on delivery, when not in use they can be stacked and tucked away for when they're required, saving much needed space.
