Volume	700ltr

These stackable skips have a drop base consisting of a single door which can be opened and closed directly from the forklift truck just by moving a lever. This allows scraps and waste to be easily, automatically and safely dumped, minimizing working time and eliminating the risk of injury. This version of our openable bottom skips with the single door is especially suitable for the collection and unloading of bulky materials. All skips come with CE marking plate and user manual as standard.
