Delivery is calculated at checkout according to postcode and pallets used. Collection from our Kettering premises is free.

Specifications	
Capacity	500ltr
Overall Size	1412x800x973mm

This Centurion tipping skip has a volume capacity of 500 litres and a load capacity of 1000kg. These Tipping skips are ideal for collection and safe handling of materials such as waste and scrap. Emptying the tipping skip is easy with a lever handle releasing the hook mechanism - see below for more information. The tipping skip sits on 125mm dia nylon wheels housed in 2 fixed and 2 swivel castors allowing for easy movement via a sturdy push handle. For forklift use, there are channels incorporated in the skip subframe to securely locate the forks and prevent the tipping skip from sliding off the forks.
