Brake System

Delivery is calculated at checkout according to postcode and pallets used. Collection from our Kettering premises is free.

Specifications	
Capacity	2000ltr
016730	2000

This Centurion tipping skip has a volume capacity of 2000 litres and a load capacity of 2000kg, the bucket on this range of tipping skips is mesh. These Tipping skips are ideal for collection and safe handling of materials such as packaging waste like cardboard or plastic, especially materials saturated with liquid as the mesh sides allow good drainage. Emptying the tipping skip is easy with a lever handle releasing the hook mechanism - see below for more information. The tipping skip sits on 160mm dia nylon wheels housed in 2 fixed and 2 swivel castors allowing for easy movement via a sturdy push handle. For forklift use, there are channels incorporated in the skip subframe to securely locate the forks and prevent the tipping skip from sliding off the forks.
