Side Options	3 or 4 Sided
Unit Weight	73.5kg
Mesh Size	100 x 330mm
Finish	Bright Zinc Plate
Load Per Shelf	750kg
Shelf Option	Loose

This is a giant of a roll pallet at 2 metres wide! The roll cage is a demountable trolley with the sides and back lifting off the roll pallet base in simple steps. The roll pallet sides and base are made from a ladder style rod infill.

The demountable roll pallet design allows the roll cage to be broken down in simple steps and compactly stored when not in use. The central pair of castors give the roll pallet good weight distribution when mobile, enhancing safety. This is one of the largest standard roll cages available in the mobile roll pallet market.

This is the 3 sided unit; also available is a unit with an additional half-drop front door to make it a 4 sided roll pallet. Bright electro-zinc plating with a lacquer coat comes as standard, other finishes are available to order. Loose shelves are available which locate on the mesh strands — up to 3 shelves per cage.
